### "ONE-DAY NATIONAL SEMINAR ON IMPACT OF CORPORATE GOVERNANCE IN EMERGING BUSINESS ENVIRONMENT"

Organised by  
POST-GRADUATE DEPARTMENT OF COMMERCE

On  
20<sup>th</sup> November, 2019

### BROCHURE

Corporate governance has evolved and grown significantly in the last decade. Numerous countries have issued corporate governance codes, and the recommendations of these codes, that typify "good" corporate governance, undoubtedly contribute towards increased transparency and disclosure.

Corporate governance is a process, relation and mechanism set up for the corporations and firms based on certain guidelines and principles by which a company is controlled and directed. The principles provided in the system ensure that the company is governed in a way that it is able to set and achieve its goals and objectives in the context of the social, regulatory and market environment, and is able to maximize profits and also benefit those whose interest is involved in it, in the long run.

Good corporate governance is characterised by firm commitment and adoption of ethical practices by an organisations across its entire value chain and in all its dealings with a wide group of stakeholders encompassing employees, customers, vendors, regulators and shareholders.

With the internationalization of cross-border portfolios, and the financial crises that have occurred in many parts of the world, it is perhaps not surprising that institutional investors in particular increasingly look more carefully at the corporate governance of companies. After all, corporate governance goes hand in hand with increased transparency and accountability. This increased transparency and accountability should, of itself, lead to a better flow of foreign direct investment (FDI) and more stable financial markets.
